

# Machinery.

ENGINEERING EDITION.

Index to Vol. X.

September, 1903, to August, 1904.

1904.

THE INDUSTRIAL PRESS.

66 WEST BROADWAY.

NEW YORK.

# Index to Volume X.

Alloys of High Tensile Strength. Herbert E. Field .....	315	Curtis Steam Turbine and Its Manufacture, The .....	1	The Useful Elephant .....	654	Journal, An Air Lubricated. Arthur W. Cole .....	468
Alloys Suitable for Bearing Purposes, A Study of .....	66	Cutter Working on a New Principle, A Milling .....	354	"Thermit," Lecture Upon. To Europe in Sixty Hours .....	183	Jump Drill or Trepan, Extraordinary Shaft Sinking with the .....	464
Alloys, Zinc Aluminum .....	514	Cutting Fractional Screw Threads. Fred H. Colvin .....	143	Turbine Developments, Other .....	419	Kaup, W. J.: Metal Coloring .....	179
Alternating-current Motors for Railway Work—American Developments. Wm. Baxter, Jr. ....	304	Death of Robert H. Thurston, Sudden .....	134	Where Interchangeability Pays .....	418	Kleinhans, Frank B.: Deep Drilling .....	244
American Blower Co.'s New Office Building .....	14	Deep Drilling. Frank B. Kleinhans .....	244	"Factor of Safety" .....	181	Use of Diagrams and Tables for the Solution of Problems in Gearing ..	357
A. S. M. E., Dec., 1903, Meeting .....	227	Design of Punch and Riveter Frames. John S. Myers .....	127	Fair of '46, Anecdotes of the .....	40	Latent Heat Question, The. Lathe, Hydraulic-Feed 14-inch Boring .....	453
A. S. M. E. Meeting in Chicago, May 31 .....	417	Design, Notes on. C. F. Blake: (1) Machinery Shafting..	362	Fairfield, Howard P.: Spindle Construction (1). (2) .....	523	Lathe, Koehler's Profile, Robert Grimshaw .....	528
A. S. M. E., Twenty-fourth Annual Meeting of the .....	251	(2) Machinery Shafting, (concluded) .....	397	Field, Herbert E.: Alloys of High Tensile Strength .....	584	Lathe Spindles, Talk on. F. Emerson .....	485
Automobiling, Early .....	402	Designation of Standard Machine Parts .....	215	Alloys of High Tensile Strength .....	315	Lathe Work, Estimating Time for, Henry Hess ..	449
Baltic, The New White Star Steamer .....	662	Die Head, Adjustable, and Method for Making Threaders for Use in same. Jos. M. Stabel .....	207	Fireproof Paints, Value of. Fitch, Charles H.: Accurate Machine Description .....	509	Le Blond Automatic Index Plate Drilling Machine ..	346
Bauer Propeller-blade Shaping Machine .....	132	Die Making, Notes on. Frank E. Shallor .....	649	Flanders, Ralph E.: Camming, Directions for, the B. & Sharpe Automatic Screw Machine..	28	Le Blond Machine Tool Co.'s Shop, R. K. ....	403
Baxter, Wm., Jr.: Variable Speed Motors, 395, 452, 512, 573, 636	636	Differentiation of Engineering, The .....	27	Making Master Cams .....	603	Lee, G. E.: Counterbalancing Locomotives .....	365
Beams and Planes Severally Supported and Eccentrically Loaded, Problems in. C. F. Blake .....	571	Drawing, Mechanical, and the Shop .....	20	Flexure Simplified. John S. Myers .....	194	Leonard, W. S.: Some Practical Points in Machine Design .....	415
Beams, Flexure of (Flexure Simplified) .....	194	Drilling Machine, Le Blond Automatic Index Plate..	346	Floorplate and Concrete Foundation, Long .....	651	Locomotive, Centenary of the, 1803-1904. A. R. Bell ..	457
Bell, A. R.: Centenary of the Locomotive, 1803-1904 .....	257	Drives for High-Speed Cutting Tools, Comments on. C. E. Coolidge .....	507	Fore River Ship and Engine Company's Plant, Improvements at the. E. L. C. ....	462	Locomotives, Counterbalancing. G. E. Lee .....	365
Early Steam Engines .....	509	Dynamos, Humming of....	666	Forming Tools, Straight and Circular. Jos. M. Stabel..	515	Machine Description, Accurate. Charles H. Fitch ..	28
Betts Machine Co., The Reconstructed Shop of the..	22	Eccentrolinead, The. M. S. Smith .....	535	Foundry and Pattern Department of the B. F. Sturtevant Co. ....	121	Machine Designs, Some Practical Points in. W. S. Leonard .....	415
Bicycle Two-Speed Gear, The Columbia .....	531	Electricity from Fuel, The Reid Process of Producing .....	254	Gardner, F. N.: A Talk on the Disk Grinder .....	547	Machine Shop Equipment. Oscar E. Perrigo: (1) .....	11
Birstock, W. W.: Table for Computing the Cost of Castings .....	536	Emerson, F.: Talk on Lathe Spindles..	485	Gas Distribution by Gas Power, High Pressure .....	367	(2) Equipment of Tool Room and Store Room. (3) Plans for the Drawing Room and its Equipment .....	111
Blake, C. F.: Notes on Design .....	362-397	Engine with Corliss Gear, A Marine .....	181	Gas Turbine, The .....	17	(4) Equipment of the Pattern Shop and Pattern Storage Room .....	171
Problems in Beams and Planes Severally Supported and Eccentrically Loaded .....	572	Engineering Knowledge, Indication of the Advance of. Engineering, The Differentiation of .....	509	Gear, The Columbia Bicycle Two-Speed .....	531	(5) Equipment of the Iron Foundry .....	240
Blowing Engines with Mechanically Operated Piston Valves for Air Cylinders .....	187	Engines, Early Steam .....	509	Gear Cutter, Old: History John Steptoe Shaper Co..	217	(6) Equipment of the Forge Shop .....	293
Boller Bracing. Charles L. Hubbard (1) .....	18	Estimating Time for Lathe Work. Henry Hess .....	449	Gearing, Use of Diagrams and Tables for the Solution of Problems in. Frank B. Kleinhans .....	357	(7) Shop Transportation Equipment .....	375
(2) Calculations for Through Stays .....	82	Explosions, Compressed Air. Exposition, Question of. Power at the St. Louis..	402	Gears, Spiral. C. E. Coolidge .....	30	(8) Miscellaneous Equipment .....	409
Boring Mill, The "Betts" Worm-driven .....	25	Exposition, The Louisiana Purchase .....	352	Gordon, J. R.: Some Tools Used in the Manufacture of Globe Valves .....	427	Machine Tools, What are the New, to be? Prof. John E. Sweet .....	253
Boring Mill, The Poole Worm-driven .....	81	Exposition, The St. Louis..	77	Gradenwitz, Dr. Alfred: The Single-phase Motor in Europe .....	305	Machinists' Den. A. ....	668
Bridge, New Williamsburg, Opened to Pedestrians, Dec. 19 .....	228	Editorial: Alcohol for Industrial Purposes .....	350	Use of Magnets in Connection with Cranes....	590	Magnets in Connection With Cranes, The Use of. Dr. Alfred Gradenwitz .....	590
Brown, Walter: High Speed Tool Steels..	534	Allis-Chalmers Co., New Ventures of the .....	419	Electrically-driven Portable Tools .....	652	Markham, E. R.: Speeds and Feeds .....	105
Bullock Electric Mfg. Co., Shop No. 3 of the .....	283	A New Old Engine .....	16	Grimshaw, Robert: Koehler's Profile Lathe..	528	Tool Making .....	167, 263, 289
Cams, Making Master .....	603	Are the Claims for Education Made Good? .....	76	Grinder, A Talk on the Disk. F. N. Gardner..	547	340, 412, 481, 519, 592, 663	355
Camming the Brown & Sharpe Automatic Screw Machine, Directions for. Ralph E. Flanders .....	6	Are We Eager to Learn? Asked to Ante-up .....	472	Gun, Breech Mechanism of the 16-inch Coast Defense .....	176	High Speed Steel .....	355
Card Index in the Drafting Room, The .....	152	Automatic Sprinklers on Shipboard .....	655	Hamilton Corliss Engine Works, The New .....	231	Measuring External Thread Diameters. Joseph M. Stabel .....	248
Cast Iron, Process for Hardening .....	578	Automobile, The Dangerous .....	299	Hardening Cast Iron, Process for .....	578	Mechanical Terms: A Criticism .....	495
Castings, Table for Computing the Cost of. W. W. Birstock .....	536	Compressed Air and Machine Tools .....	530	Heating and Ventilating Plant, Unique .....	21	Metal Coloring. W. J. Kaup ..	179
Centenary of the Locomotive, 1803-1904. A. R. Bell..	457	Cunard Company Leads off Data, Suppressed .....	472	Hess, Henry: Estimating Time for Lathe Work .....	449	Microphotography. W. H. Sargent .....	485
Chain, Notable Installation of the Renold Silent..	456	Electricity as a Motive Power for Machine Shops .....	16	High-Speed Cutting Tools, Comments on Drives for. C. E. Coolidge .....	507	Milling Cutter Working on a New Principle, A .....	354
Cincinnati Shaper Co., New Shop of the .....	116	Engineers, Examination for Stationary .....	182	High-Speed Steel .....	17	Motor, Alternating-Current Railway .....	125
Clutch, A New Form of Friction .....	100	Genius, Mis-Directed Inventive .....	594	High-Speed Steel. E. R. Markham .....	355	Motor Drives for Hartness Flat-turret Lathe .....	316
Cole, Arthur W.: An Air Lubricated Journal .....	468	Government Experiments. Haswell, Chas H. ....	594	High-Speed Tool Steels. Walter Brown .....	534	Motor, The Single-phase, in Europe. Dr. Alfred Gradenwitz .....	305
Colvin, Fred H.: Cutting Fractional Screw Threads .....	143	Improving the Steam Engine .....	182	High-Speed Tool Steel Tests .....	300	Motors, Alternating-current Crane .....	467
Injector Troubles and Repairs .....	337	Indicator, Regarding the. Inventions and What Constitutes Abandonment..	418	Hollow Bloom Tube-making in England .....	666	Motors, Alternating-current, for Railway Work—American Developments. Wm. Baxter, Jr. ....	304
Compressed Air as an Insulator .....	518	Is this General English Practice? .....	299	Hubbard, Chas. L.: Boiler Bracing .....	82	Motors, Why the Built-in. Failed .....	256
Coolidge, C. E.: Spiral Gears .....	30	It Pays To Keep Informed .....	350	Hydraulic Installations .....	196	Myers, John S.: Design of Punch and Riveter Frames .....	127
Comments on Drives for High Speed Cutting Tools .....	507	Machine Shop Equipment. Mill Type of Construction, The .....	419	Index, The Card, in the Drafting Room .....	152	Flexure Simplified .....	194

SEPTEMBER: (1) Constants for Finding Diameter of Bottom of Thread .....		Different Fiber Strains per Square Inch .....		Pounds, Avoirdupois per Square Foot .....		Bronzes (Navy Department.) MAY: (1) Tap Drills for "V" Threads .....	
(2) Comparison of Twist Drill (Morse) and Drill Rod (Crescent or Kidd-Stubbs) Number Sizes .....		(3) Diagram of Strength of Round Shafts for Combined Twisting and Bending Moments .....		(2) Approximate Weight per Inch of Face for Cast-Iron Gears .....		(2) Tap Drills for "V" Threads. (Continued.) .....	
(3) Morse Standard Tapers .....		(4) Diagram of Round Shafts, for Finding Diameters at Different Fiber Strains when Diameter for Fiber Strain of 7,500 Pounds has been Found from Table 3 .....		(3) Weights and Areas of Cold Rolled Steel Shafting .....		(3) Table of Angles for Headstock of Milling Machine, when Cutting End Teeth in Mills, etc. .....	
(4) Brown & Sharpe Standard Tapers .....		DECEMBER: (1) Diagram for Designing Beams .....		(4) Weight of a Superficial Foot of Cast Iron, Weights of Nuts and Bolt Heads in Pounds; Specific Gravity and Weight of Metals .....		(4) Diagram of Diameters and Speeds .....	
OCTOBER: (1) Diametral Pitches for 15-degree Involute and Cycloidal Cast-Iron Gear Teeth per Inch width of face for Continuous Service in One Direction .....		(2) Diagrams for Designing Beams .....		MARCH: (1) Diagram of Journal Friction Showing Resistance at Pitch Diameter of Wheel in Terms of Load on the Journal .....		JUNE: (1) Chain End Link and Narrow Shackles .....	
(2) Diametral Pitches for 15-degree Involute and Cycloidal Cast-Iron Gear Teeth, per Inch Width of Face, for Continuous Service in One Direction. (Continued.) .....		(3) Table of Sectional Moduli and Weights per Foot of Beams of Various Sections .....		(2) Diagram of Chain Friction Showing Resistance Due to One Bend of Chain .....		(2) Proportions of Keys .....	
(3) Formulas for Ball and Roller Bearings .....		(4) Table of Sectional Moduli. (Continued.) .....		(3) Standard Drum Scores .....		(3) Crane Chain. Table for Eye Bolts .....	
(4) Formulas for Ball and Roller Bearings. (Continued.) .....		JANUARY: (1) Standard Upset, Cottered and Tee Bolt Ends .....		(4) Standard Soft Steel Rope Sockets with Pin .....		(4) Proportions of Hooks .....	
NOVEMBER: (1) Diagram of Torsional Shearing Strength of Round Shafts for Different Fiber Strains per Square Inch .....		(2) Dimensions for Brass Handwheels (U. S. Navy Standard) .....		APRIL: (1) Contents MACHINERY Data Sheets September, 1898, to March, 1904, inclusive .....		JULY: (1) Standard Boiler Rivets .....	
(2) Diagram of Transverse Strength of Round Shafts for .....		(3) Standard Babbitted Bearings .....		(2) Contents MACHINERY Data Sheets (Cont.) .....		(2) Length (Under Head) of Rivets .....	
		(4) Standard V-strips, Standard Male and Female Brass Flanges for 250 pounds Pressure .....		(3) Comparisons of Money Standards .....		(3) Standard Round Slotted Nuts .....	
		FEBRUARY: (1) Weight of Rolled Sheet Metals. Weight in .....		(4) Logarithms of Convenient Constants, Composition of .....		(4) Inches to Decimals of a Foot .....	
						AUGUST: (1) Size of Wire, Drills or Sheets .....	
						(2) Size of Wire, Drills or Sheets .....	
						(3) Size of Wire, Drills or Sheets .....	
						(4) Useful Factors .....
